# CrewManager™

Total Solution for Planning, Scheduling and Dispatch of Crew

## Presenting CrewManager

An essential tool to manage projects involving planning and scheduling of your crews. Providing schedule flexibility, fast scheduling changes, future projections of workload, and real time reporting.

--- CrewManager is becoming an indispensable tool for Line Foremen, Dispatchers and Distribution Operations Managers.

CrewManager is a software application that does everything you need to manage your crews: Assigning jobs and communicating details, see crew schedules in a simple calendar view, make schedule changes in seconds, record and view crewmembers on leave and see how it affects the work load, view projections and reports including comparisons like estimated vs. available vs. actual man-days. With CrewManager you can operate at a higher level of productivity.

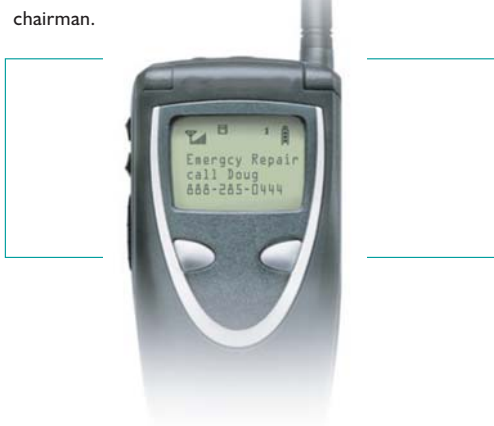

## Operate @ A Higher Level

*Spend minutes instead of days* - Tedious compilation of reports is a thing of the past. All relevant data is captured in CrewManager. Reports are generated in real time, with a click of a mouse.

*Schedule efficiently, save costs* - Choose crews based on skills, availability and location. Schedule easily with drag and drop features.

*Forget the calculator and spreadsheets* - CrewManager will calculate job duration based on your estimates of the man-days to complete the jobs, and number of crewmembers you assign to work on each job. See it all on one simple screen.

*Visibility and Transparency* - One screen shows workload of jobs assigned, jobs waiting to be assigned and projected jobs. Depending on user right, the schedules can be made visible for the foreman to the chairman.

## Great Features to Help You Along

Take a look at some of the features that CrewManager comes with:

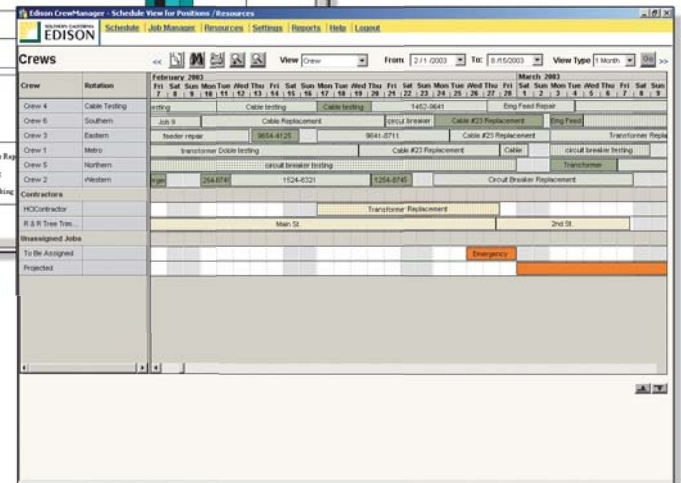

### To Schedule, Just Drag & Drop

On a single screen see all the jobs and the assigned crews. Juggle your options, optimize your resources and minimize costs. Send job info right from your screen to all that need this information.

### To Cruise, Use Crews Control

Cruise along and control every aspect of the schedule from a pivotal calendar view. Assign jobs, make and communicate changes, print reports and plan schedules.

### For 20/20 Vision, Make a Wish

Want a report for the jobs of the week or the day? Want a birds-eye view of all jobs coming? --- CrewManager has views and reports for your every need.

### Emergency Repairs = Panic NO MORE!

Scheduling emergency repairs, trouble tickets will seem like a walk in the park. Simply drop the job into an existing schedule and let CrewManager automatically reschedule all other jobs to your pre-set priorities.
